

The smallest part you make... can make an impact on someone's future

The delicate components of a collision sensor system must be precisely machined – many thousands of times over. The new Star SR-20RIII automatic lathe makes the precision manufacture of critical parts both highly repeatable and exceedingly fast, with twice the fabrication speeds of previous systems. Accuracy, efficiency and productivity... with so much riding on it, is there any reason to settle for less? We understand it's not just a part, it's a part of life.
