

Star CNC Machine Tool Corp. Features ECAS-20T at EMO

The recently introduced ECAS-20T Type B Swiss-style turning machine from Star CNC Machine Tool Corp., a provider of Swiss type technology to the precision machine tool industry, was exhibited at EMO Milano 2009.

The turning machine has up to 11-axis with independent three turret-design allowing three tools to be used at any time, working simultaneously in the cut. This capability allows for high productivity and the machining of complex parts.

George Bursac, General Manager, Star CNC Machine Tool Corp. explains the capabilities of the ECAS-20T Type B Swiss-style turning machine.

A small turned part can be machined quickly with three turrets allowing three tools to be used at one time.
